

# welligent + CaredFor

## Elevate Patient Engagement with CaredFor

### Empower Your Organization to Deliver Better Outcomes

Your Welligent EHR is the backbone of your clinical and operational workflows— but to truly maximize its impact, you need a way to keep patients, families, and alumni connected beyond appointments. That’s where CaredFor comes in.

As a mobile-first digital front door, CaredFor integrates seamlessly with Welligent to deliver personalized engagement, real-time communication, and ongoing community support throughout the entire care journey. From reducing no-shows and detecting relapse risk early, to strengthening alumni and family connections and tracking outcomes in real time, CaredFor supercharges your Welligent investment— helping you improve retention, outcomes, and efficiency without adding operational burden.

### ⚡ Supercharge Your Welligent Investment

Maximize the impact of your EHR by seamlessly integrating CaredFor— an enhanced patient engagement platform designed to streamline workflows, support daily patient tracking, and unlock greater clinical and operational value.

### ⚙️ Build to Work Better Together

CaredFor and Welligent form a unified digital ecosystem supporting the entire care continuum— from intake to discharge to alumni engagement— strengthening outcomes through features like digital contingency management, peer support, and referral tracking.

### ♥️ Drive Better Outcomes with Less Cost

With automated engagement tools that reduce no-shows, lower AMAs, and boost referrals and admissions, CaredFor enables your team to focus on delivering care, not managing technology.

### Mobile-First Unified Patient Experience

Put the entire patient journey in the palm of their hand— from first contact to lifelong alumni engagement. CaredFor serves as your mobile-first digital front door, giving patients easy access to appointment reminders, digital surveys, peer support, telehealth, bill pay, and secure referrals. The result: Stronger connections, higher engagement, and fewer patients lost along the way.

### Data-Driven Patient Outcomes and Reporting

Engage patients more effectively with micro-interactions and daily tracking tools that provide a complete picture of progress. This empowers your team to reduce AMAs and intervene earlier— helping improve both short and long-term outcomes.

### AI-Powered Predictive Analytics

CaredFor’s predictive analytics and sentiment analysis detect early signs of relapse— whether it’s a substance use setback or a mental health plan falling off track. By surfacing risk indicators in real time, providers can deliver timely interventions that prevent patients from straying too far or help them quickly get back on course. When paired with contingency management, the platform not only boosts motivation and supports healthy behavior change, but also safeguards recovery progress, fostering long-term stability and better outcomes.

### Frictionless Implementation and Custom Branding

We handle the heavy lifting— seamlessly integrating CaredFor with your Welligent data and customizing it to your brand. In just three months, you’ll see revenue climbing and costs to serve declining. How? Your Welligent system becomes supercharged, patients self-serve for many of their needs, revenue cycle management improves, clinician fatigue drops, and— most importantly— your community sees real, measurable improvement.

### Integrated, Actionable Reporting Dashboards

Get a clear, real-time view of what’s working across your programs, and what needs urgent attention. Monitor provider effectiveness, track patient progress and referrals, and measure business performance— helping you optimize care delivery and negotiate stronger rates with payors.
